

GRADING & REGISTRATION SERVICES

SNM will use its Patent Pending Process to Grade and Register or Register Only your Card or Comic using standard grading guidelines assisted by computer software. For comics, we use the Overstreet Grade guidelines.

Other Items can be Registered upon request to establish ownership for insurance reasons. This would include Limited edition items, cards and comics Graded by other services or something special to you.

We supply a Certificate including a photo for each item we process. A numbered custom tamperproof hologram is put on the item and an identical one on the certificate.

For items that are Graded, the certificate will identify the item and state the grade providing proof of ownership.

For items that are Registered, the certificate will identify the item providing proof of ownership. A copy is kept on file to support the owners claim of ownership for an insurance claim resulting from theft or natural causes. Natural causes would be a flood or fire.

For SNM Graded items, this tamper proof numbered seal will show any kind of tampering with the item and its protective holder.

For Registered items, when permitted, the Hologram will be applied to a tamper proof seal that will show if the item has been removed from its holder or placed directly on the item being registered.

Copies of Certificates can be supplied to support the owners claim if the originals are lost, for a fee. When selling or gifting the item, new ownership documentation can be generated for the new owner for a fee. The original Certificate must go to the item's new owner
